DELFT EARLY CHILDHOOD DEVELOPMENT PROJECT

Empowered by PROCHORUS
COMMUNITY DEVELOPMENT

JUNE 2025

Building project feedback:
To date, we have reported the fixing of three crèches roofs. We are happy to announce that the work on our fourth crèche, Angels Day Care, is completed! At this crèche, building work included replacing a ceiling, adjusting the roof height, including more natural light, adding a room dividing wall, a paint makeover, and installing two little toilets that this crèche never had! This building project is a beautiful example of God making everything new!

Crèche feedback:
- We celebrate with Judy of Honey Bunnies, who received her crèche's health certificate in May. This compliance means that she is almost completely registered!
- We praise God for healing Hillary Figland's voice! Last year, she struggled to speak and could only whisper. Doctors had no hope that her voice would recover. Now, a year later, she is speaking normally!
- Twenty-one of our crèches receive enriched porridge donations until the year's end!

Marion's testimony:
"Last year, one of the principals approached me; she had noticed that some crèches received food donations, but not her crèche. She assumed she had done something wrong to be overlooked. I explained that she had done nothing wrong and that the donations were small. I explained that we would not withhold anything from someone just because they have done something wrong, but we would have spoken about it in person. I also added that ***it is better to trust in the Lord than to put confidence in man,*** *especially for our needs.*

Unaware of prior conversations earlier this year, the family that prays for this crèche began giving monthly donations to cover this crèche's non-perishable food needs. Their support now feeds all the children of this creche and far exceeds last year's total donations, which were shared among several crèches. Because the family did not commit a certain number of months/years and because the donations are given randomly the crèche's principal must trust in God month by month that, if it is His will, they will receive food again; a faith lesson that she has learned practically and must continue to apply, month by month."

Let's pray!
- Pray for Louisa Impasso: Louisa is buying the property on which her crèche resides. She would like to own the property within two years! Pray for favour and finances!
- Doreen Diedericks' crèche boundary lines does not correlate with that of the municipality. She is chosen as one of the four creches in the city of Cape Town to receive assistance with registration. Pray for a miracle to occur in the clarification of her boundary lines.
- Pray for Nomfundo Mradu. She desires to purchase the open piece of land next to her house (currently a dumping site) to be the grounds of her crèche. Nothing is impossible for God!

Fixing the roof of a crèche in a township sounds like a crazy idea. Setting aside a bit of money for non-perishable food sounds insignificant. Who would care about that? Who would advocate for that? Who would fund that? God would! People who carry the heart of God would! And one roof by one roof, one healthy meal by another healthy meal - and the kingdom comes!

Looking at our roof-fixing initiative, I see light piercing the darkness, despair exchanged for hope, the forgotten receiving a future. I thank God. He remembers Delft. We thank you, your prayers, voices, donations and finances alert the world to the universal reign of Christ, bringing reconciliation, justice, wholeness, and beauty.
